

The discreet guardian

Southern Monitoring and Northern Monitoring's

ArchAngel companion

This unique solution works in parallel with MAS which is why it is our choice for a discreet Vulnerable Worker protection.

A secure, legally compliant Duty of Care solution for high risk situations.

ArchAngel companion is an innovative portable device using SIM and GPS technology to provide a dynamic tool to discreetly manage day-to-day risks.

- Uses multiple technologies to locate the user - accurate to within 5 meters
- Permits the user to raise the alarm discreetly without compromising safety
- Has a rip alarm alert if the device is snatched; also a fall detection and "man down" alert
- Allows [Southern Monitoring Services](#) to listen in, and permits 2-way conversations between the user and [Southern Monitoring Services](#)
- Vibrates to provide discreet notification to user that call monitoring is under way
- Stealth mode enables [Southern Monitoring Services](#) to re-establish contact with the user if a call drops out
- Raises the alarm if a predetermined safety perimeter is breached
