

# DualCom DigiPlus®

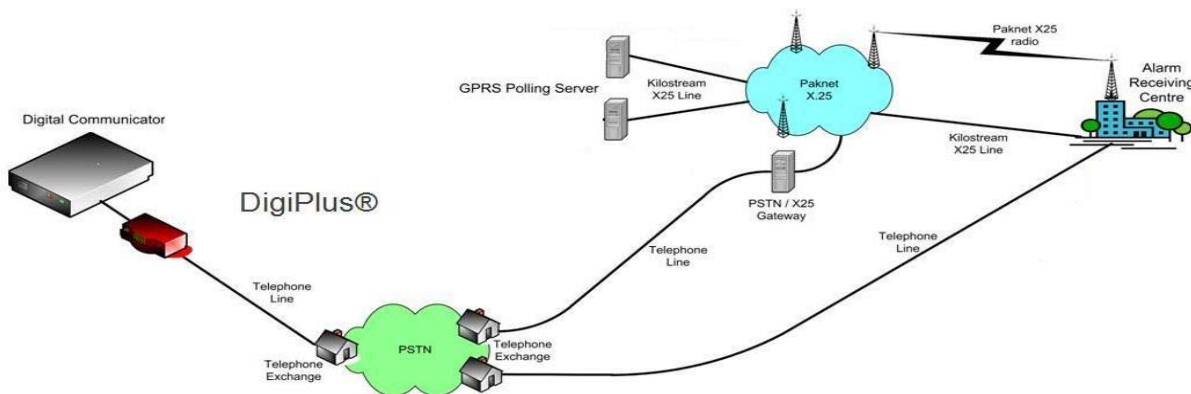

Make your digital communicators 21CN compatible, with free phone numbers and remote configuration by adding a small hardware module that compliments your existing digital communicator.

DigiPlus® was developed in conjunction with Vodafone and fits between your existing digital communicator and telephone line providing an improved and robust signalling solution.

- Guaranteed to operate over BT's new 21<sup>st</sup> Century Network (21CN)
- Connects to all existing digital communicators and telephone networks
- Installs in less than 5 minutes as part of a routine maintenance visit
- Can be volume transferred between ARC's
- Send all signals and Grade 2 polling via free 0800 telephone calls
- Connects to the ARC via Gemini® CSL's fully managed, secure network

**Keep customers** with all alarm and polling telephone calls free  
**Be confident** you have a fully 21CN compatible service  
**Know** that your engineers can upgrade each system in 5 minutes  
**Add revenues** with additional features your customer will enjoy  
**No need** to change Digis, ARC's or telephone service providers  
**Control** future number and ARC changes remotely as volume transfers
