Remote Security Management

Audio Talk-down

Audio talk-down is an invaluable tool for security solutions; it can be used both with pre-recorded messages or triggered by analytics in a camera or with live messaging from Southern Monitoring Services.

Deterring incidents and theft not only creates a safer environment, it can also provide a lot of savings. These additional benefits include reducing damages and loss of goods, cutting back on the administration associated with incidents, reducing insurance premiums and lowering legal costs.

Features include:

- Rapid audio response
- Option of two-way communication
- Automated or live audio broadcast

Benefits include:

- Instant audio challenge
- Criminal deterrent
- Staff protection
