

Southern Monitoring Services and Northern Monitoring Services

Remote Security Management

Remote Security Management

Professional key holding and alarm response

Remote management

Our trained officers attend your property and reset the alarm, or escalate to the emergency services on your behalf.

Keep people safe

A 24/7 team of trained security officers, who hold key worker status, reduces your dependence on others travelling to what could be a dangerous situation.

Share the responsibility

An alarm activation triggers outreach to a list of emergency contacts. If someone is out of contact, they will try the next person on the list.

Understand the situation

Full job reports with details of the incident and photos of the scene are emailed on completion, so you can keep close tabs on the situation.
