

Remote Security Management

Remote Security Management

Remote Interactive Response

Our unique solution, combining technologies from intercoms, CCTV & Access Control, gives us the ability to remotely conduct security guard tasks such as visitor validation, vehicle access and area lockdowns.

Our monitoring team can speak with the visitor to ascertain whether they have been validated for site access, or can direct them to a designated holding zone pending any additional security checks, activating barriers or doors remotely.

Features include:

- Multi-discipline compatible
- Uninterrupted support
- Tailored service

Benefits include:

- Eliminates requirements for a physical guard
- Staff on site risk reduction
- Productivity improvement (24/7 service)

Remote Interactive Response IN ACTION

High-value Car Storage Yard

- Remote intercom and barrier raising for out of hours staff leaving or arriving.
- Direct unvalidated vehicles to leave the site
