

Remote Security Management

Remote Security Management Video Safeguard

Utilising Video Monitoring, we can offer protection to colleagues who are working either alone or in high risk/high security locations.

The addition of intelligent video analytics allows our monitoring operators to detect, view and respond to suspicious activity immediately with live event-based monitoring, real-time alert notifications and instant response options.

Features include:

- Virtual lone worker support
- Rapid response to incidents
- Next generation lone working

Benefits include:

- Improved staff safety
- Reduce impact of incidents
- Employee piece of mind

Video Safeguard IN ACTION

Banking Chain

- Individual contacts operator to confirm approaching the Bank
- Operator views live cameras and confirms no duress (other individuals close by)
- Operator unlocks premises and views until employee in and door is closed
